PROJECTS

Question To All Answers *(Rails, Backbone)* | live | github
Text and annotation sharing app inspired by Genius
- Single-page Backbone.js app built on a RESTful Rails architecture
- Overrides Backbone's default Model#parse to create Rails associations
- Uses rangy, a javascript library, to index lyrics and add annotations

Asteroids *(Javascript, HTML5)* | live | github
Asteroids game made with HTML5 Canvas
- Uses trigonometry and vector math for distance and velocity
- Dynamically updates score and lives

Chess *(Ruby)* | github
Command line version of Chess
- Applies multiple levels of class inheritance to keep the code DRY

SKILLS

Ruby, Rails, Javascript, jQuery, Backbone, HTML, CSS, SQL, git, TDD
